

Upgrade to a new level of asset management

Introducing Infor EAM version 11.1

Thousands of successful companies trust Infor® EAM to improve performance and extend the lifespan of business-critical assets and equipment. Our new release, Infor EAM version 11.1, gives you a range of world-class capabilities that you can use more quickly, easily, and economically via the cloud or on-premise. It's also accessible on popular mobile devices. By helping you bring the power of Infor EAM to the locations where your work gets done, you'll be ready to manage your entire asset lifecycle more efficiently and economically.

Gain improved mobility

Infor EAM v 11.1 enhances its best-in-class feature set with several critical improvements, including:

- **Better warranty claim management**—Many Infor EAM customers gain a surprisingly quick payback just by taking advantage of the warranties that already cover their assets and equipment. This release of Infor EAM gives you even more extensive and usable capabilities for tracking, managing, and filing warranty claims that can dramatically cut your maintenance costs.

- **Improved maintenance order management**—Your maintenance staff can't do everything at once. That's why Infor EAM gives you sophisticated techniques for planning, managing, and performing maintenance according to priorities that best serve your company's needs. Infor EAM version 11.1 brings you a more user-friendly interface with complete mobile support, to keep your maintenance operations running at peak performance and optimal cost.
- **Enhanced linear asset support**—When your asset base is organized as a linear system, like a pipeline or rail system, it's important that you treat the entire installation as a sequential, linear whole. Piecemeal approaches often leave gaps, or overlook dependencies that can affect the efficient performance of the entire system. Infor EAM version 11.1 brings you a whole new level of support for linear assets, so that you can monitor your entire system more effectively.
- **Expanded mobile support**—We've expanded support for Android and iOS platforms, so that you can access the capabilities of Infor EAM on the device you like best. With newly designed, responsive interfaces tailored for your mobile device, you'll find it easier than ever to take advantage of Infor EAM on your own terms.

You'll also gain better compliance reporting and monitoring, an improved user interface for better accessibility, and more robust capabilities for accessibility, compliance, and equipment configuration.

Because of our investments in making Infor EAM entirely cloud-ready and mobile-friendly, you'll have the widest possible range of deployment options to generate maximum advantage for your company.

Take action now

There's never been a better time to move up to the expanded capabilities of Infor EAM to take advantage of cloud-based mobility and rich asset management features. As always, you'll get the unmatched management, analytics, and reporting features along with industry-specific power to help you get better performance from your assets and equipment and improve performance across your organization.

By helping you bring the power of Infor EAM to the locations where your work gets done, Infor EAM version 11.1 helps you manage your entire asset lifecycle more efficiently and economically.
